Every element

of the collection has been designed with meticulous attention to detail. **Minimalist** wall profiles and **elegant** threshold strips enhance the clean lines of the entire enclosure.

The newly developed two-piece recessed hinge **securely** keeps the door in perfect alignment without the risk of sagging or glass settlement, even after years of use.

The design

is completed by an ergonomic handle that fits **comfortably** in the hand and **follows** the same radius as the hinges. The result is a **harmonious** design that looks elegant from every angle.

CLEAR GLASS

FROSTED GLASS

The highlight

of the collection is **8 mm** safety glass with an **AntiDrop** protective coating, available in clear or frosted finish, ensuring **easy** maintenance and a long-lasting flawless appearance.

The GLOBE collection offers a wide selection of **modern** profile and hardware finishes:
