

# MONOLITH *infinity* system

## HYDRO and HYDRO&AIR

Electronic control

Suction fitting  
Ø 58mm

Water jet  
directionally  
adjustable  
Ø 50mm

Air jet  
Ø 18 mm

Water jet  
Ø 9mm

- ☞ The MONOLITH Infinity system was designed specifically and exclusively for MONOLITH acrylic bathtubs, taking into account the specific placement of components and the limited space under the bathtub. A completely new type of directionally adjustable water jets in combination with an increased number of air jets makes bathing in a MONOLITH bathtub a unique experience. Its minimalist electronic control ensure that the full potential of the designed system is exploited.
- ☞ You no longer have to worry about how to surround the whirlpool bath and what tiles to choose, or whether a complementary acrylic cover panel will not interfere with the look of your dream bathroom. With the Infinity whirlsystem, you can combine the aesthetics of precision workmanship offered by the MONOLITH collection with the relaxing element of a classic massage.
- ☞ The Infinity massage system includes a Hydro and a Hydro&Air massage option. Both types offer a choice of additional accessories, such as the Stream Clean disinfection rinse, Chromo Plane illumination, or bath temperature reheat with safety thermostat.
- ☞ By combining the Infinity massage system with the MONOLITH acrylic bathtub, we take relaxing bathing pleasure to a whole new level.
