

TIKAS 30,5x61,3 / 61,5x61,5

Properties

Size	30,5x61,3 / 61,5x61,5
Shape	Square, Rectangle
Surface	Matt
Colours	Gray
Texture	Stone
Character	Porcelain, Frost resistance
Category	Wall tiles, Floor tiles, Stone & Concrete

TIK001 30,5x61,3 cm
Thickness 7.4
Package contains 1.55 m², 8

TIK005 61,5x61,5 cm
Thickness 8.5
Package contains 1.54 m², 4

Explanations

Matte surface
Matt glaze tile.

Porcelain tiles

By pushing into the mold under high pressure remains in the ceramics minimum of air bubbles. It is then fired at high temperatures, making the final product hard, strong and abrasion resistant. At the same time, it is less absorbent. Located universal use in interior and exterior, on walls and floors. Sintered paving is especially suited to high-stressed areas such as tiles or building facades.

Frost resistance

Frost resistance is determined by the degree of water absorption of the tile (ie it does not provide water to freeze it). For tiles for indoor use is not required frost resistance and moisture absorption is usually more than 10 %. In contrast, frost-resistant glazed tiles have an absorption of up to 3 %. For exterior are suitable sintered tiles with water absorption below 0.5 %.
